

# ***NEW IN STORE – THE BIKE RACK***

***Forget the trailer - City Coast Motorcycles is excited to introduce you to the very clever space saving, inexpensive and hassle-free **Bike Rack**.***

No need to haul a trailer to your next motocross or mini bike ride. The Bike Rack has arrived. Just a short extension to the length of your car, there are no parking hassles and there is very little drag.

Fitting is a breeze – the tough galvanised frame simply fits onto your car's tow ball or tow bar hole. Removing is equally as easy, but you have the assurance of locking the towball or tow bar hole. And when it is not in use, unlike a trailer the Bike Rack takes up minimal space in your garage.

The Bike Rack comes in two sizes. The mini Bike Rack carries up to 80 kg and fits most standard 50mm tow balls with a 75mm wide tongue. Carrying up to 120kg, the large Bike Rack fits bigger vehicles with a two inch square hitch, and features wide rear tie down points to keep your load stable and secure. The large Bike Rack also comes with a ramp, to ensure you get out on the track in no time flat.

If that is not incentive enough, it is perfectly legal and you do not require extra rego (though your car's registration plate should be visible).

***For more information call, or call in to City Coast Motorcycles.***
